Código	Título	CH	Ementa
UNI 139	International Approach of Oral Health Epidemiology	15h	WHO methods to evaluate oral health conditions and the different health systems in Brazil, USA, Europe and Africa; epidemiology of oral diseases in different countries and the organization of different public health systems.
UNI 145	Sustainable production of food in a tropical environment	30	The course Sustainable Production of Food in a Tropical Environment will take a multidisciplinary approach to present the production processes of food of animal and vegetable origin, with the participation of professors in the fields of health, food production and chemistry. The different production systems and the relation of health and disease of animals, plants and environment will be presented in each system currently in use for the production of food for the human species. The issue of food surveillance, residue analysis, risk of environmental contamination, and the relationship between the chemical quality of food and its impact on the promotion of human health will also be addressed. Considering the participation of students of different nationalities and eating habits, students will be given the opportunity to present seminars on the food culture of their country and the historical aspects related to their population's diet. Finally, the food security condition of each nation that is represented through the academics and the commercial links with Brazil in this area will be contextualized.
UNI 169	The Geopolitics of Energy	45h	Recent history of energy geopolitics since the creation of OPEC. Fundamental concepts of energy politics, focusing on energy security, energy interdependence between importers and exporters, resource nationalism and the oil curse, and the link between fossil fuels and climate change. Application of these concepts in case studies of large energy-consuming and exporting states. The role of renewable energy and the future of energy geopolitics. The course will introduce the student to the broad concept of energy security and its many dimensions, familiarizing the student with energy policy formulation and planning. Apply theories and concepts of energy security and energy policy to several national and/or regional case studies and analyze them comparatively and how they interact internationally.
UNI174	Topics in International Studies II: Getting from College to Career: Career Management	30	This is an introductory course designed to guide under graduating students on planning their career considering the transition from academy to labor market. Topics will include concepts of career in the contemporaneity, career anchors, career scripts, career images, career paths, social network, different generations in the workplace, drawing up a curriculum and making a career plan.
UNI 174	Topics in International Studies II: Introduction to Law and Development	30	This course reviews the existing literature on the relationship between law and national development, particularly in regards to: determinants of development; institutional theories of development; rule of law; political regimes; ethnic conflict; gender; public administration; corruption; state-owned enterprises versus privatization and public-private partnerships; international trade; foreign direct investment; and foreign aid.
UNI 174	Topics in International Studies II: Understanding Korean Literature and Culture	30	This course is designed to examine "Korean Culture and Literature" through various sources such as literature, history, music, film, philosophy and others past and present. Exploring the key concepts and thoughts which have become the foundation of the current Korean culture, you will deepen your understanding of Korean culture.
UNI 174	Topics in International Studies II: Korean Economy in the Globalized World	30	Discussion of economic, political, social, and environmental issues and analyze how they have resulted in the interconnected world that we now see. Examination of Korea's developmental experience as well as major issues and challenges it is facing.

UNI175	Topics in International Studies III: Global Health and Diplomacy: Operational Concepts and Contemporary Practices	45	This course has a flexible content and intends to focus on health diplomacy as it relates to health issues that transcend national boundaries as well as how they are being addressed by different groups and at different levels of governance.
UNI175	Topics in International Studies III: Global Perspectives of Indigenous Health	45	Marked by the profound racial and socioeconomic inequalities of Brazilian society, the SARS-CoV 2 / Covid-19 pandemic has highlighted the differentials in collective health between indigenous peoples and other Brazilian populations. The course will address the issues from local to global and the risks and benefits of international institutions. It will seek to develop the basic cultural competence of students in Primary Care for Indigenous Health. It will address the issue of structural and social determinants of indigenous health, especially the environment; the role of SUS; indigenous health at a local and global level, discussed within the framework of possible and necessary interculturality in the current situation, seeking inspiration from indigenous health professionals and their practices that seek an integration between official medicine in Brazil and traditional indigenous knowledge.
UNI176	Topics in International Studies IV: International Finance	60	The demand and supply of money in the international financial markets. Exchange rates and the relative values of currencies. Risk management and hedging by companies with international operations. International portfolio investment and international projects valuation. Long-term financing of international investment projects. The macroeconomic environment of international finance. Financial instruments and tools for managing foreign exchange and country risk, raising capital in international financial markets.
UNI 192	Intercultural Communication	30	Intercultural Communication represents an interdisciplinary field of study. In order to present a variety of theories developed and highlighted at different stages of the formation of Intercultural Communication as a research area in its own right, this seminar aims to approach it from a linguistic, an anthropological, as well as a phenomenological perspective. Special attention will be given to the interactions themselves in which the participants are involved and which might be expressed in multimodal ways. For this purpose, we will bring together modules from conversation analysis, intercultural pragmatics, as well as gesture studies and cultural linguistics. Based on concrete multimodal analysis of interactional sequences, the students learn to analyze how meaning is co-constructed in intercultural communication. Additionally, they will also be introduced to the means by which experiences of alterity are negotiated and categorized (self)reflexively on verbal, prosodic and corporal levels.
