1. Instructions on Accessing MinhaUFMG

After completing your in-person enrollment process and receiving your registration number, in order to access to the university's Wi-Fi for undergraduate and graduate students, you must register on MinhaUFMG—an online platform used for various activities, for communication among students and faculty, and to provide access to computer labs and the university's Wi-Fi. To do so, students must send an email to suporte@dti.ufmg.br and request access to the MinhaUFMG platform. In the email, you must include a scanned document and your registration number.

For other visiting students on exchange programs, the professor or activity coordinator must access the MinhaUFMG page and register them as guests.

Another option for accessing Wi-Fi without logging into MinhaUFMG is to connect to Eduroam. Link: http://www.redesemfio.ufmg.br/eduroam/, provided your home university is also part of the network.

Access for Visiting Professors/Researchers

UFMG faculty members should access the application available at: https://sistemas.ufmg.br/registro-convidados-rede-sem-fio/ and fill out the form. After selecting their nationality, the corresponding fields (CPF, ID, or passport) will appear, which allow for the visitor's identification and ensure their accountability in the event of inappropriate use of UFMG's IT resources.

Once registration is complete, the visitor (professor/researcher) will receive an email with instructions on how to set up the device. It is essential that the temporary password be changed on the same day.

Further guidance: suporte@dti.ufmg.br

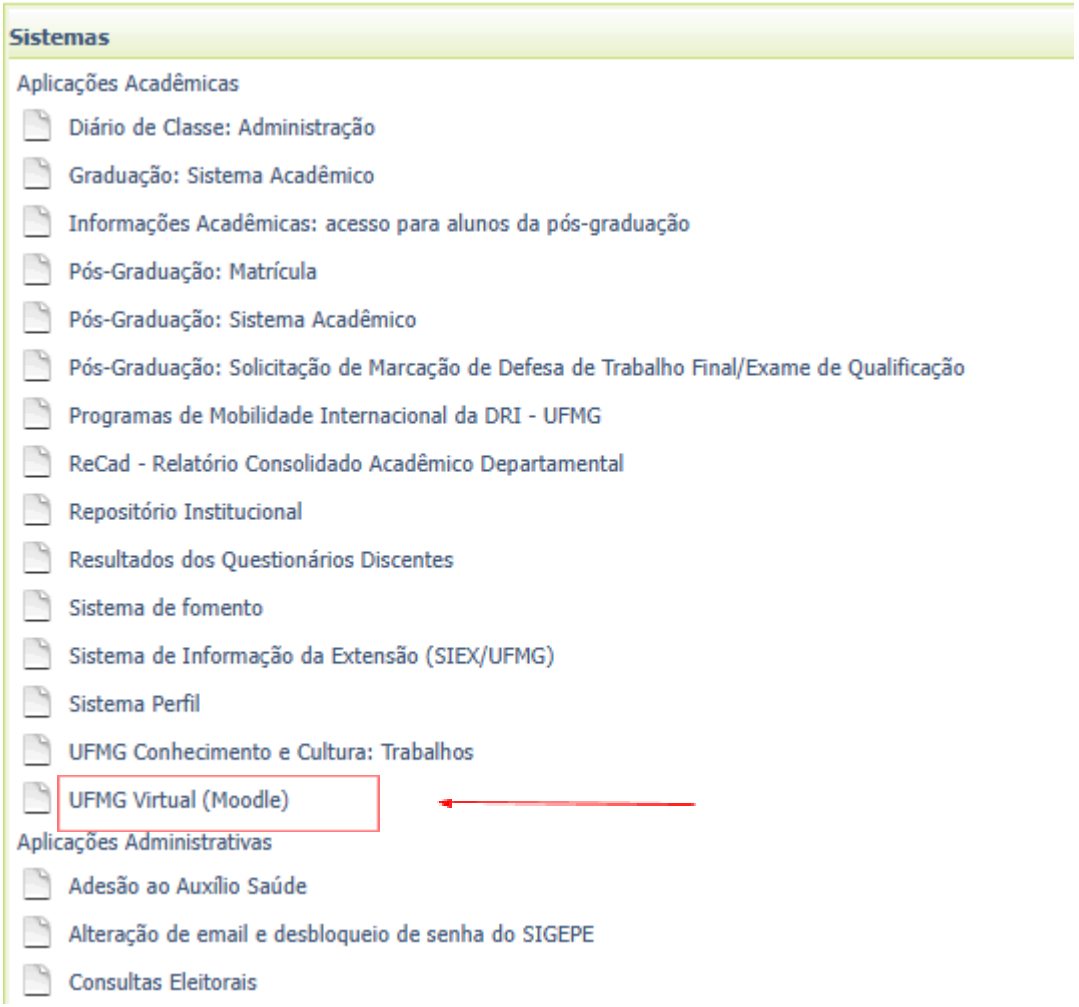

2. Guidelines for Accessing Moodle

Moodle (UFMG Virtual) is the platform used by UFMG to support academic activities, allowing students to access materials, activities, announcements, and other information related to their courses and programs.

After gaining access to MinhaUFMG, students can access Moodle in two ways:

1. Through MinhaUFMG

After logging in to MinhaUFMG, students can access UFMG Virtual (Moodle) directly through the platform. The option will be available on the MinhaUFMG homepage.

2. Through the Siga app

Students can also access Moodle through the **Siga** app, available for Android and iOS.

After downloading the app, you must use the same login credentials you received for MinhaUFMG—that is, the same username and password used to access the platform.

Important: Access to Moodle is limited to students who have a UFMG registration number. Therefore, visiting professors and researchers who are not academically registered at the University do not have access to the platform through MinhaUFMG or the Siga app.
