Valor total fomentado: R\$ 48.099,35

Título do Artigo	DOI
Chemogenetic modulation of sensory neurons reveals their regulating role on melanoma progression	10.1186/s40478-021-01273-9
The Top 100 Most-Cited Papers in Cariology: A Bibliometric Analysis	10.1159/000509862
Biomarker responses induced by bisphenol A on spermatogenesis in a Neotropical teleost fish are temperature-dependent	10.1016/j.ecoenv.2021.112670
Abstraction of the Supervisory Control Solution to Deal with Planning Problems in Manufacturing Systems	10.1109/tac.2021.3053228
The GNE-KLH anti-cocaine vaccine protects dams and offspring from cocaine-induced effects during the prenatal and lactating periods	10.1038/s41380-021-01210-1
Active probing to highlight approaching transitions to ictal states in coupled neural mass models	10.1371/journal.pcbi.1008377
Evaluating the state-of-the-art in mapping research spaces: A Brazilian case study	10.1371/journal.pone.0248724
Testis structure, duration of spermatogenesis and daily sperm production in four wild cricetid rodent species (<i>A. cursor</i> , <i>A. montensis</i> , <i>N. lasiurus</i> , and <i>O. nigripes</i>)	10.1371/journal.pone.0251256
Health behavior patterns of sugar-sweetened beverage consumption among Brazilian adolescents in a nationally representative school-based study	10.1371/journal.pone.0245203
STING regulates metabolic reprogramming in macrophages via HIF-1 α during <i>Brucella</i> infection	10.1371/journal.ppat.1009597
The gene repertoire of the main cysteine protease of <i>Trypanosoma cruzi</i> , cruzipain, reveals four sub-types with distinct active sites	10.1038/s41598-021-97490-2
